🎓 Education

BSE, Bahria University Karachi Campus

2023 – Present (6th semester)
Karachi, Pakistan

Intermediate, Bahria College Karsaz

2021 – 2023 | Karachi, Pakistan

Matriculation, Army Public School C.O.D

2021 | Karachi, Pakistan

🧠 Technical Skills

Programming Languages: C# | Python

Frameworks & Technologies: ASP.NET @ MVC | Machine Learning (Scikit learn, Pandas, NumPy)

Databases: SQL Server | SQL

📁 Technical Projects

AI Based Customer Interaction Analysis (Extension of CIES),
Python, Machine Learning

10/2025 – 12/2025

- Developed a **chat based interaction system** replacing keystroke logging in the CIES platform.
- Implemented chat transcript collection between employees and customers.
- Built a **machine learning model trained on interaction transcripts** to analyze employee behavior and customer satisfaction.
- Generated automated evaluation reports for management using model predictions.

Customer Interaction Evaluation System (CIES),
ASP.NET MVC, C#, SQL Server

04/2025 – 06/2025

- Designed and developed a web based system using **ASP.NET @ MVC architecture** to evaluate employee performance.
- Implemented **remote activity monitoring and employee management dashboard**.
- Built a **keystroke analysis module** to collect interaction data for behavioral analysis.
- Developed admin dashboards for **employee registration, and activity tracking**.
- Stored and processed employee activity data using **SQL Server**.

Huffman File Compressor, C#, Windows Forms

- Implemented **Huffman Encoding algorithm** to compress files by assigning variable length binary codes.
- Developed file compression and decompression functionality.
- Built GUI using **Windows Forms** for file selection and compression operations.
- Achieved storage optimization while preserving file integrity.

Snake Game, Java, Java Swing

- Developed a desktop Snake Game using **Java Swing GUI framework**.
- Implemented real time keyboard input handling and collision detection.
- Applied **object oriented programming principles** for game structure and logic.

🧩 Tools

- Visual Studio
- Visual Studio Code
- SQL Server Management Studio
- Git
