EDUCATION

Bahria University Karachi Campus <i>Bachelor of Software Engineering (BSE) — 6th Semester</i>	Karachi, Pakistan 2023 – Present
Bahria College Karsaz <i>Intermediate (Pre-Engineering)</i>	Karachi, Pakistan 2021 – 2023

TECHNICAL SKILLS

Languages: C#, Python, SQL, Java
Frameworks & Technologies: ASP.NET Core, ASP.NET MVC, Entity Framework, REST APIs, Windows Forms
AI & ML: OpenAI API, LangChain, Machine Learning (Scikit-learn, Pandas, NumPy), Prompt Engineering
Databases: SQL Server, SQLite, relational data modeling
DevOps & Tools: Git, GitHub, Visual Studio, VS Code, SQL Server Management Studio, Agile/Scrum
Cloud (Familiar): Azure (App Service, Azure OpenAI, Azure SQL)

RELEVANT COURSEWORK

Data Structures & Algorithms | Database Management Systems | Software Design & Architecture |
Machine Learning | Data Mining | Web Engineering | Cloud Computing

TECHNICAL PROJECTS

AI-Powered Resume Screening, Interview & Job Scraping System | *Python, OpenAI API, LangChain, FastAPI, React2*

- Built an end-to-end AI-powered hiring pipeline that scrapes live job postings and matches them against candidate resumes using LLM-based semantic analysis.
- Integrated OpenAI API with LangChain to perform structured resume screening, scoring candidates against job description requirements automatically.
- Developed an AI interview module that generates role-specific questions, conducts simulated interviews, and evaluates responses using LLM-based scoring.
- Exposed all features via a RESTful FastAPI backend with a React frontend, enabling end-to-end recruiter and candidate workflows.

AI-Based Customer Interaction Analysis (Extension of CIES) | *Python, ML, Scikit-learn* 10/2025 – 12/2025

- Replaced keystroke logging with a chat-based interaction system, collecting employee-customer transcripts for behavioral analysis.
- Trained a machine learning model on interaction transcripts to evaluate employee behavior and customer satisfaction scores.
- Generated automated management reports using model predictions, demonstrating end-to-end ML pipeline integration.

Customer Interaction Evaluation System (CIES) | *ASP.NET MVC, C#, SQL Server* 04/2025 – 06/2025

- Designed and developed a full-stack web application using ASP.NET MVC to evaluate and monitor employee performance.
- Built REST-based admin dashboards for employee registration, activity tracking, and remote monitoring — closely mirroring enterprise .NET application patterns.
- Implemented a keystroke analysis module for behavioral data collection, with data persisted and queried via SQL Server.

Huffman File Compressor | *C#, Windows Forms* 2024

- Implemented Huffman Encoding in C# with full compression and decompression support, achieving measurable storage reduction while preserving file integrity.
- Designed a Windows Forms GUI for user-friendly file selection and compression operations, applying OOP design patterns.

TOOLS & ENVIRONMENT

Visual Studio | Visual Studio Code | SQL Server Management Studio | Git & GitHub | Postman | Windows
